GARRETT AT4 Beach Hunter Metal Detector Hello, thanks for looking. This is my trusted Garrett AT4 metal detector. Best Metal Detectors provides useful information for consumers who are looing to purchase a metal detector. We cover all metal detector types and models. Some of the manuals are.pdf or.zip files and may take some time to download. Some are.html compass metal detector manual and can be viewed by just clicking on the link. We cover all metal detector types and models. One leading name in metal detectors is Compass. Compass metal detectors do not require a lot of maintenance and are not difficult to use. Compass metal detectors utilize a sensing system that is designed to ignore common mineral deposits in the earth. This technology ultimately allows the Compass metal detector to seek deeper in the earth for buried metals. Read your owners manual carefully before assembling and using your metal detector. Use a small Phillips screwdriver to open the battery compartment lid on the control housing and install your 9volt battery. Close the battery compartment lid and tighten the lid screw. Remove the thumb nut and screw from the extended rod at the lower front section of the metal detectors control housing. Attach the large end of the telescoping arm to the section of extended rod at the base of the control housing, insert the screw and thumb nut and tighten by hand. Remove the black knurled nut from the detectors loop. After you have done this then remove the machine bolt and the two white plastic washers. Set the small end of the telescoping arm to the loop and align the mounting holes on the loop with the mounting holes on the telescoping arm. Once the holes are aligned, replace the white washers, the machine bolt and the black knurled nut and tighten them by hand. Loosen the black plastic adjusting clamp at the center of the telescoping arm by turning it to the left. Adjust the length of the arm to your height

and then tighten the adjusting clamp.<http://ametansk.ru/uploads2/6es7-322-8bh01-0ab0-manual.xml>

Wrap the loop cord around the shaft and then plug it into the bottom of the control box. Flip the power switch on. Things You'll Need 9volt battery Screwdriver Tips Check your battery frequently, as a low battery is the biggest cause of metal detector malfunctions. When not using your Compass metal detector, remove the battery and store it in the freezer. References Compass Magnum Metal Detector Owners Manual About the Author Ashton Daigle, a New Orleans native, graduated from Southeastern Louisiana University in 1998 and went straight to work as a journalist. In 2005 he tackled the biggest news story of his life Hurricane Katrina. Daigle is writing a collection of essays What It Means to be a Saints Fan. Find Your Next Great Science Fair Project. How to Check the Direction of a Diode Science Project on an Electric Bell How to Read an Engineer Compass How to Use a Bushnell Voyager Telescope How to Use a Micronta 4003 Metal Detector How to Mount a Circuit Board in an Electronic Project Box. Pretty good shape. Anyone ever used one of these. Figured we might put in some batteries tomorrow and see if we can figure it out. But once tuned and steady, it operated just like the 77b. Like, I think there was a button for fast vs slow tune. That aids in the ability to hug the ground. Those would be circa early to mid 1970s. They became antiquated at the advent of TR disc., vlf all metal aka G.E.B, motion disc, etc. However, there's one thing those can do, that no machine today can do Eliminate masking for individual nails. Here's what I mean While they didn't have discrimination, yet they had the innate inherent ability to null on small iron. I.e. it discriminated out individual nails, rusty wire, etc. As opposed to masking. And had no other form of discrimination. And didn't work well in mineralized soils. And were a bear to keep balanced. But I keep a 77b on hand for certain hunt situations. Like the silver sabre, shadow x2, Whites classics, etc.

But the 77b and 94b did it a tad better. Compass owners have a tough time parting with their units. Picture above shows just a sampling of PaulCA's collection. Some of the Compass models are Goldstar, Challenger series X70, X80, X100, X200, Coin Scanner series, Gold Scanner series. It was my grandfather's and I don't believe it got much use. It is in working condition and has both an external speaker and a jack for headphones. I took a picture of the inside of it and as you can see it looks like new for the most part. I believe that the original battery holder has been replaced so I filled the empty space in this one with bubble wrap to keep the batteries firmly in place. I am sure someone who is familiar with metal detectors can find a more professional solution. It has Fine Tuning, Coarse Tuning, Volume, Meter Zero, Battery Check, and Ground Condition knobs. In trying to learn about this item I have found that it apparently is somewhat rare the only one I see on Ebay and has iron see through abilities. All in all, a very nice conditioned piece for a collector of fine vintage items. As I mentioned, I am not very familiar with this type of item so please look closely at the pictures and let me know if you have any questions, I will help Thanks, Josh. I have enjoyed working with Michael, Daniel and their team at Detector Electroics Corp.

<http://homebackpackers.com/images/calculus-salas-10th-edition-solutions-manual-download.pdf>

They have done a fine job representing the Detector Pro line since it was first introduced in 1996. One of the things I see them do is go the extra mile for their customers. It is always nice to see a family run business endure and we wish them many years of continued success. We appreciate the partnership from Michael and Daniel at MetalDetector.com. As a family owned business, we choose our partners carefully. We have found that their team has done a fine job of representing our line. With thirty years of success under their belt, we expect that they will be a partner for many years to come. We at Treasure Products, manufacturer of the VibraProbe and VibraTector, want to congratulate Daniel and Michael on the admirable milestone of being in business for over three decades. The dedication and product knowledge that your staff exhibits has been a great benefit to us. We offer our best wishes for your continued success. I have found that the team at MetalDetector.com has done a fine of job representing the entire JW Fishers line. They have partnered with us in helping to bring our products to both individuals, larger corporate and governmental organizations. Michael and Daniel have established a knowledgeable team that has done the job of getting the correct product in to the hands of each consumer. I wish them continued success as they represent our products in the years to come. I have been impressed by the professional approach and the experience of Daniel, Michael and the entire team at Detector Electronics Corp. Three decades of superior customer care has been the key to their success and large sales volume. We have enjoyed working with Michael, Daniel and their esteemed team at Detector Electronics Corp. We feel that they have been the best choice for representing the good reputation of the Makro Detectors in the region.

<https://www.freizeitbauwagen.de/images/calculus-ninth-edition-solutions-manual.pdf>

They have been working towards 100% customer satisfaction ever since they started their cooperation with us as our exclusive Distributor in the USA and Canada. We are pleased to see both their business and the sales in their region continue to grow. It is nice to see both our family business and theirs growing together. We see our companies moving forward together for many years to come. Garrett has a longstanding quality relationship with Detector Electronics Corp since the 1980s. I have seen them grow from a regional dealer to one of the largest internet dealers yet they have maintained that special care for the customer for over three decades. Their team of knowledgeable, helpful and friendly staff and family make their dealership a first choice for the treasure hunter. MetalDetector.com has been a valuable business partner to Fisher Research Labs for many years. They continue to grow while still offering the best in customer service and after sale support, which is very important to FRL. We wish to congratulate them on 3 decades of business and

stellar service to our mutual customers. Their entire staffs knowledge of our product helps to ensure the customer gets the right detector for their needs regardless of what they might be. We look forward to our future relationship and continued success of MetalDetector.com and their entire staff. I recently had the pleasure of meeting with the team at MetalDetector.com at their newly expanded facility in Southborough, MA. I have to say that I was impressed with their operation and knowledge of the Teknetics product line. When the Teknetics product line was recently relaunched, MetalDetector.com was one of the first partners we contacted. They have had a long standing relationship with the brand as one of the original Teknetics dealers in the country. We value long standing relationships and are excited to have them as a member of our team.

Its been an honor and privilege working with the fine folks at Detector Electronics for over 25 years. Its no surprise that Sondra and Davids fine sons, Michael and Daniel have continued in their parents tradition of being exemplary businesspeople who take the time and care enough to really know their clientele. Its always been a pleasure working with you. DRS Electronics, GmbH is proud to have Detector Electronics Corp. I have known Michael and Daniel for over a decade. Their team is genuine and knowledgeable. They provide exceptional support and service to our customers. They are a recognized leader in the industry. Internationally their business is known for excellent customer support. Their presence is a great confidence for treasure hunters. MetalDetector.com has been a great business partner for many years and the best choice for representing Makro Detectors in the USA. With the addition of Nokta products to their product portfolio in 2018, we are confident that our businesses will continue to grow together for many years to come. Gary Mischeau CEO Whites Electronics Gary Storm Owner Detectorpro Ingrid Hawk Partner Lesche Products Michael Bernstein Owner Treasure Products, Inc. By the end I felt I was dealing with a friend rather than a faceless company on the net. Well done! And, by the way, my 7 year old son Juanito found a nickel yesterday when he took his detector out for the first time. If things keep going this way the detector will have paid for itself within a few short decades. But seriously, he is really enjoying it and hoping to find his longdreamedof buried treasure some day. Happy to do business with you, Hello Dan, Remember me. I bought my Tesoro Tiger Shark from you. It came just when you said it would, and works just as you told me it would. Thanks for your help in sorting through the maze of detectors. Dear Sondra, 1160 GRAM Meteorite. Dont ask where. One of many! As far as being excited I all most had a stroke.

Heres a photo of one Meteorite I found on the surface, over 800 grams and a 447 gram one. The one in the middle is my first. The bar magnet has some small Iron meteorites on it. Dear Detector Electronics, I received the Tesoro Sand Shark today and want to thank you. Tried it, love it, looking forward to many enjoyable hours with it. Thanks again. Dear Customer Service, Just wanted to thank all involved in a recent shipment to me that was a gift for my grandkids. I ordered 2 detectors but for some reason only one was shipped. After calling your company you bent over backwards to get the second detector to me on time for giving to my grandchildren. I explained that we exchange gifts a week early so my children and their families can be in their homes Christmas morning since some travel distances are involved. The second detector arrived last Friday in time for our celebration last Saturday. THANKYOU. I order quite a few things online and have experienced some terrible companies but you are the best. Best regards and have a wonderful Holiday Season Hi Guys, I have just come in after spending an hour or at my local beach with my son, which is only a 5 minute walk from my home called Deception Bay. This is the first time i have ever used detector. The very first thing it detected in less than a minute was a two dollar coin, boy we were so excited. Not by the amount, but by the fact that on its maiden voyage it detected a coin. We then detected a ten cent piece. We cant wait to take it to a popular beach and I will practice more with the settings. I would like to thank you for your prompt service. My detector arrived at my door In Brisbane Australia in less than a week. This is the first time I have used any service like this outside of Australia, but with this kind of service and ease of buying and your range of goods this will be the first of many transactions. I just wanted to say thank you to Scott who made my recent purchase so pleasant.

I am enjoying my Tesoros and have found lots of cool stuff so far. Just waiting for that first gold find. Thanks again for all the help that was provided in making my decision. Hi Scott, I was amazed at how fast I received my BOUNTY HUNTER. The order arrived in perfect condition, and in only three days after I placed the on line order. The four part series about selecting the right product was also appreciated and helped me to make the right decision for my purchase. You are truly a company that takes care of business and most importantly your customers. It is a pleasure doing business with you and I will gladly recommend you to anyone that wants to buy a metal detector. Thanks for the GREAT SERVICE. Dear Customer Service, I am a very happy camper. Yesterday I took my Garrett Ace 250 out for the first time to some local parks. My total find was about 150 coins. The detector works so well and so easily. It only took me about a half an hour before I new what every button did. PS I plan on buying my next detector from you. Dear Sondra, I purchased an Ace 250 from your site for my 7 year old son and now I am hooked. This is our first metal detector and the Ace does every thing it says it will. Thanks for the fast delivery and introducing my son and I to a great new hobby. Coin shooting in Pensacola, Fl Sondra, I got the detectormy husband was thrilled. Thank you so much. You and Daniel have been so helpful. I am a first time buyer and am feeling very lucky to have found your website. Daniel helped me to locate a really great detector and you have been extremely courteous and prompt in seeing my order through. I look forward using my new metal detector. Hope you have a wonderful holiday season.overall my experience ordering off of your website was convenient and customer service was great. Thanks again. Dear Metaldetector.com I just want to thank Sondra and the rest of the gang for my Minelab Explorer SE.

It was a pleasure doing business with you and I will recommend your fine business to my other detecting buddies. Anita S. and Juan G., United Kingdom Mike T., Rockport, MA John B., San Diego, CA Dana, Mystic, CT Dick H. Steve M. Nick V., Churchville, PA Duane B., Springville, NY Bill B. David and Josh Lori G., Bessemer, AL Jason R, Massachusetts Our NoHaggle, BestPrice Guarantee on Metal Detectors The same low pricing for everyone. Whether you're a metaldetecting expert or novice, we keep it simple. We offer the lowest advertised pricing allowed by contract with each manufacturer. The personalized service you receive from our experienced team is our added bonus. Thats what we are all about. Rest assured, you will not find a better value online. Visitor I received the parcel today. Dan Great! It came right to your home. This is our first metal detector and the Ace does everything it says it will. We Ship Direct To You Detector Electronics Corp. Michael and Daniel lead the MetalDetector.com team. Each day we set out to provide you with the best customer experience in the industry. Wherever you are in the world, product specialist Maria is here to help. Maria speaks fluent English and Spanish. Heather interfaces between our office and warehouse teams to help expedite orders to our customers around the world. Moe is not only one of our product specialists; he was also one of our first customers. He has been metal detecting since 1989. Dave keeps all of the great deals and products that you see on our website up to date. When it comes to managing the warehouse to get the orders to our customers quickly and efficiently, Bob, Matt and Jake are our A team. Tom, Diana and Javier work closely with our customers to provide the highest level of customer care in the industry. Before shipments are accepted from vendors, our team closely inspects inbound orders for accuracy. As metal detectors and accessories are received, our team packages and labels each item.

Large shipments arrive from vendors in bulk. They are stored in our newly constructed bulk goods warehouse. Inventory is transferred from the bulk goods warehouse to our main warehouse where orders are picked, packed and shipped to customers. As customer orders arrive in the main warehouse our team hand picks the items. The items picked are checked for accuracy throughout the process. Michael and Bob confer on an item as an order is pulled for a customer. Once picked, orders flow down the conveyor on their way to the packing station. As the order nears the final stages of the process, each order is over packed and then cushioned with recycled materials. Michael adjusting an early Garrett Metal Detector in North Carolina at the first treasure hunt we

ever displayed our products at back in 1985. Sondra on the road again helping a customer learn about the hobby at a metal detector show. Daniel and Sondra, posing for a picture while on a family metal detecting vacation in the Caribbean. Sondra with Doyle Finch, Founder, Finchs Magic tumble clean at their location in Birch Run, Michigan. Sondra with Gary Storm, Founder of Detector Pro Metal Detectors out promoting his products at a treasure hunt in 1988. Michael and Daniel touring the Minelab factory in Australia. Is anyone looking Should we be touching these. Company cofounder, David Bernzweig who will be sadly missed as he passed away in 2006. A new generation of treasure hunters scavenging for treasures in a hay stack. Do the plastics go brittle and break easilyI might put batteries in them once every couple yrs.Unless your really into collecting vintage detectors or can get it for dirt cheap, my advice is save the money towards the 24k.Older Whites in particular. However, I had an old Compass Yukon 77B that just died sitting on the shelf. Some component just quit I never did fix it though so am not sure what it was. The only real reason to own old models is nostalgia.Its the chest mount model on the left below. These three Whites models were my first three detector models owned personally.Almost a garage sale price Most of the time replacing those old caps will bring the unit back to life. Although in most cases why bother when the new machines are so much more capable. Nostalgia I guess.Most of the time replacing those old caps will bring the unit back to life. Nostalgia I guess.Its easy! Sign in here. It appears to be exactly like the one on my old whites goldmaster II. Any help would be greatly appreciated, thanks to all that reply.I want to sweep the entire yard before I start gardening. I want to know the cheapest detector I can use that will find me needles. Totally new to this whole thing, so any advice is greatly appreciated!

What Do You Use To Transport Cylinders And All Our Artillery From Car To The Beach
Unfortunately for me, no more dinghy this year and considering the terrible weight of all the ballast Im forced to bring downthere, plus another tool Im planning in these hours, this time Im in real troubles. At least 150kg, to be carried by hand and never on my back again, possibly.Unfortunately Minelab dont let you purchase internal components or find out anything about them without logging in to their website as a repairer. The local service agent wont sell me the part but I have access to a GPX 5000 part by other means, however I need to know if the GPX 5000 Part is the same as the 4500 part.Basically that strip is the arteries of the GPX, any break in a trace and a function will fail, be in the screen, knobs, power, everything, its vital.I search mostly on Iowa farmland that I own where old homesteads were. Sold detector several years ago but want to get back into the hobby. Been researching some companies and Minelab looks like it has good detectors but never used one. Would appreciate any advice on what equipment would be appropriate of this type of detecting. Its not so much about the finding for me, its getting outdoors and the solitude of detecting. Finding is definitely a plus. I sure do dig up a lot of old rifle casings!! Would be nice if detector could differentiate these brass casings from other metals. Thanks Mike. That means it may be here at the shop.May have to give it up for good.Its just Not worth the effort anymore. At least in My area.This may finalise My decision.May have to give it upI have 100% feedback there, and these are machines Ive used.I have spent most of the time with a 1235XMay have to give it up for good.Its just Not

worth the effort anymore. At least in My area.This may finalise My decision. Sure many on here will be happy if I do. Lol.I stayed on top of it, got it, and that is the one I have.Like a Lobo Super Traq.

Cut through that with a pocket knife.Forum page views since Jan. 1, 2010. The company shut down production due to financial mismanagement. They made some Great Metal Detectors, the 13.77 khz design found coins and Jewelry through the worst possible soil conditions. At that time, better than the highest priced detectors on the market. I only have 2 very old compass schematics to post !!. If anyone has more recent schematics you are welcome to post them right here on Thunting.com !! Here are a few photos to start this topic Best Regards.Eugene Linkback You are not allowed to view links.Compass Searchcoil.jpg au52.jpg coinscannerpro.jpg compass au 2000.jpg compass coinscannerjunior.jpg I have an AU52. no manualS Linkback You are not allowed to view links.I have an AU52. no manualS Hello mdiede57. Over the years there were only 3 compass schematics that I have seen on the internet. 1. Judge I 2. Judge II 3. 77B There are only a few people that have every Compass schematic, they are former employees of Compass who have the rights to repair the Compass line. The rest of the Compass schematics might not be released for many years !! I am not sure if any more Compass schematics will ever be posted here but PCB circuit board photos are very welcome. Regards.Eugene Linkback You are not allowed to view links.Im using a Tesoro Tejon now but Id like either to have the Compass repaired or to repair it myself. The latter is a daunting task without a circuit diagram, so Im very interested to see whether there might be any particulars of those available schematics, which might apply across the model spectrum.
